Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 08/24/2010 has been entered.
2. This is in response to the communication on 08/26/2010.
3. The following is the status of claims:
Claims 2, 10-17, 22, 24, 32-39, and 44 have been canceled.
Claims 1, 3-9, 18-21, 23, 25-31, and 40-43 remains pending for examination.

Response to Arguments

4. Applicant's arguments, filed on 06/24/2010, with respect to the pending claim(s) have been fully considered are persuasive, as a result, the amendments to the claim(s) overcome the prior art of record. Therefore, the claim(s) is (are) allowed over the art of record.

EXAMINER'S AMENDMENT

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Marcel K. Bingham (Reg. No. 42,327) on August 26, 2010.

The application has been amended as follow:

In the claim(s),

Cancel

Claims 10-17, and 32-39.

Art Unit: 2162

Replace old versions of claim 1 with new versions

Claim 1

A method for automatically provisioning data in a distributed database system, the method comprising computer-implemented steps of:

a database server running under control of a first operating system that manages resources of a first computing element, wherein said database server comprises database server code separate from said first operating system;

a said database server transporting a tablespace from a ~~first~~ second file system to a ~~second~~ first file system, wherein said first file system is managed by said first operating system, wherein transporting a tablespace from a ~~first~~ second file system to a ~~second~~ first file system is performed pursuant execution of one or more routines of said database server code; and

after transporting said tablespace to said ~~second~~ first file system, said database server importing said tablespace into a local database managed by said database server.

Art Unit: 2162

Replace old versions of claim 18 with new versions

Claim 18

A method for automatically instantiating database data in a distributed database system, the method comprising computer-implemented steps of:

a database server running under control of a first operating system that manages resources of a first computing element, wherein said database server comprises database server code separate from said first operating system;

said database server transporting a set of one or more files from a first second file system to a ~~second~~ first file system, wherein said first file system is managed by said first operating system, wherein transporting said set of one or more files from a first second file system to a ~~second~~ first file system is performed pursuant execution of one or more routines of said database server code;

wherein said set of one or more files store said database data; and

after transporting said set of one or more files to said ~~second~~ first file system, said database server provisioning said database data as at least part of a database managed by said database server.

REASONS FOR ALLOWANCE

6. With respect to claims are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

With respect to the independent claims 1, and 18, the claimed features "said database server transporting a tablespace from a second file system to a first file system, wherein said first file system is managed by said first operating system, wherein transporting a tablespace from a second file system to a first file system is performed pursuant execution of one or more routines of said database server code" in conjunction with other elements of the independent claims are not suggested, anticipated or found to be obvious over the prior art made of record.

The dependent claims, being definite, further limiting, and fully enabled by the specification are also allowed.

Art Unit: 2162

7. The closest prior art, Bridge et al., USPT No. 6,272,503 relates to a method of retrieving a data item from a computer database includes partitioning the database into a set of tablespaces and storing references to data items as tablespace-relative pointers, indicating a location relative to the tablespace containing the data item.

Wang, USPT. No. 5,758,345 relates to implementing a database on a data processing system but fail to teach the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
